LED Invisilight Ribbon Linear Lighting

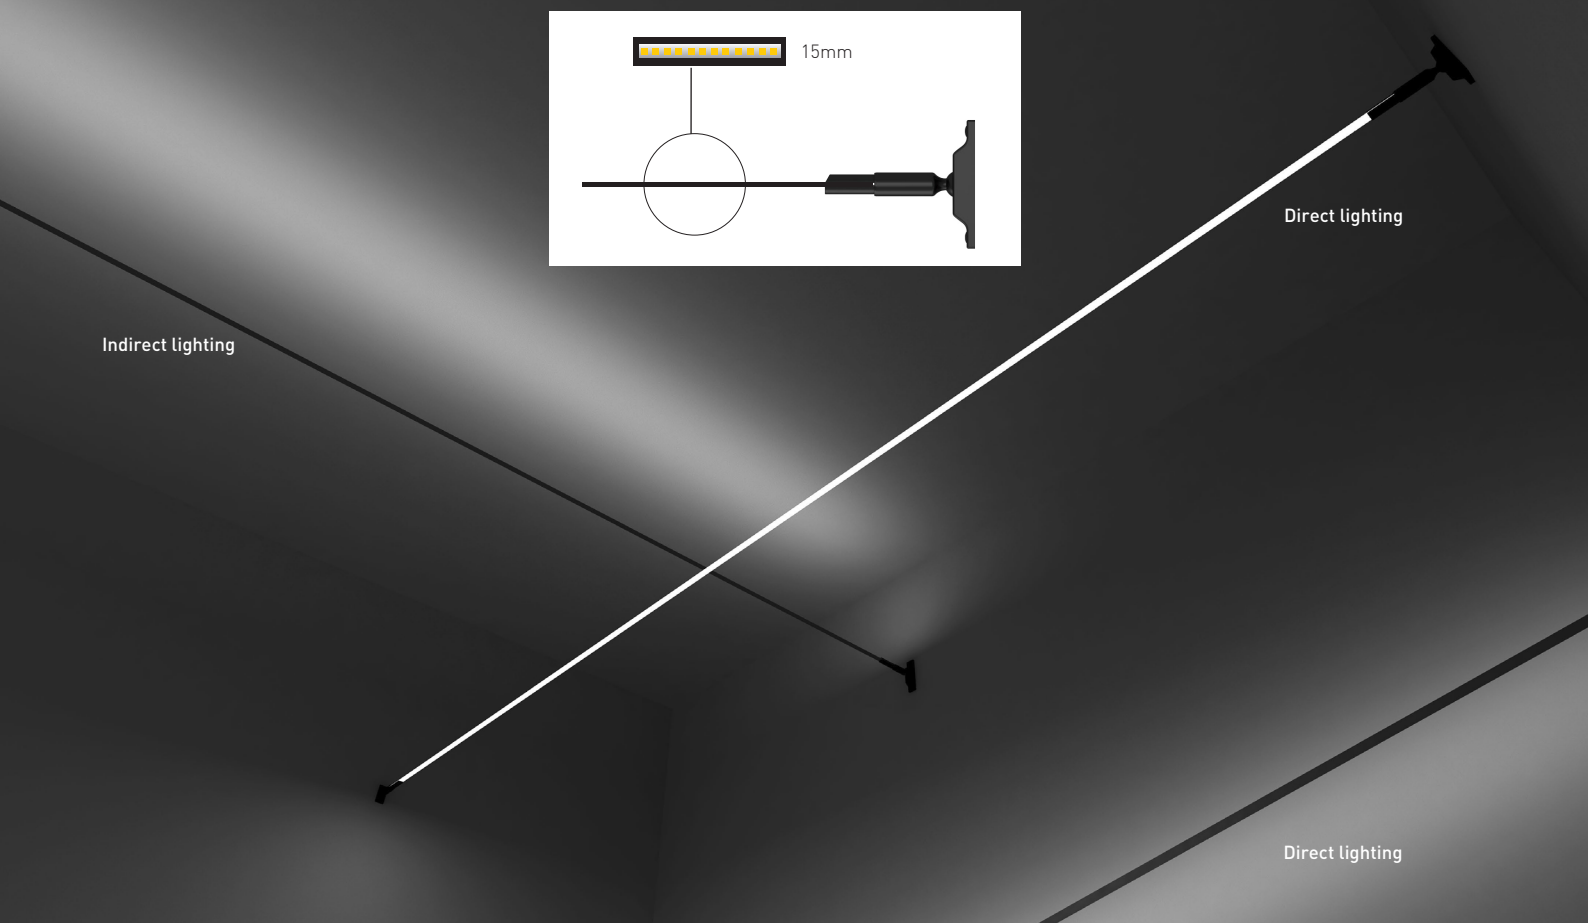

TECLEL's Invisilight Ribbon Linear Lighting system offers a unique and distinctive option for high wall and ceiling lighting.

The sytem comprises two anchor points (up tp 10m apart) connected by a rigid 15mm metal ribbon housing the LED strip lighting.

The uses and permutations are limited only by ones imagination, producing an architecturally interesting light installation.

This unique and effective lighting system offers incredible flexibility both as to its installation and use.

Indirect Lighting

Using 19.2W or 14.4W, the system casts indirect light against walls, ceilings or other architectural surfaces. This light 'bounces off' the illuminated surface and casts a subtle glow into the entire space providing a unique alternative to wall uplighting.

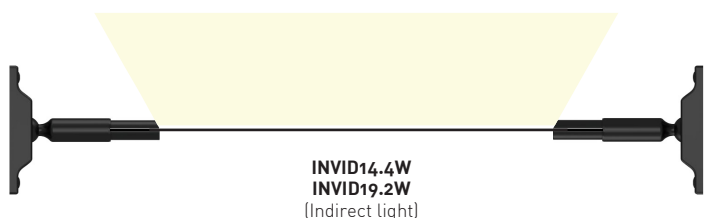

The LED strip is available in a range of colour temperatures and can be cut to desired lengths up to 10m.

Dimmable via DALI, TRIAC or 0-10v

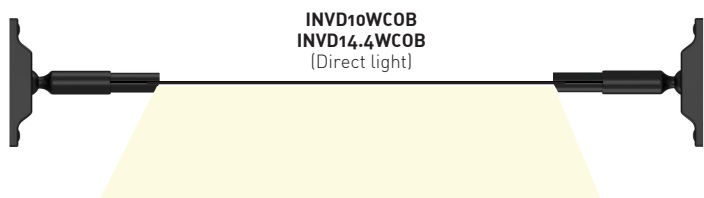

Direct Lighting

Using dotless, COB technology, the LED strip can provide direct lighting to a feature area or space.

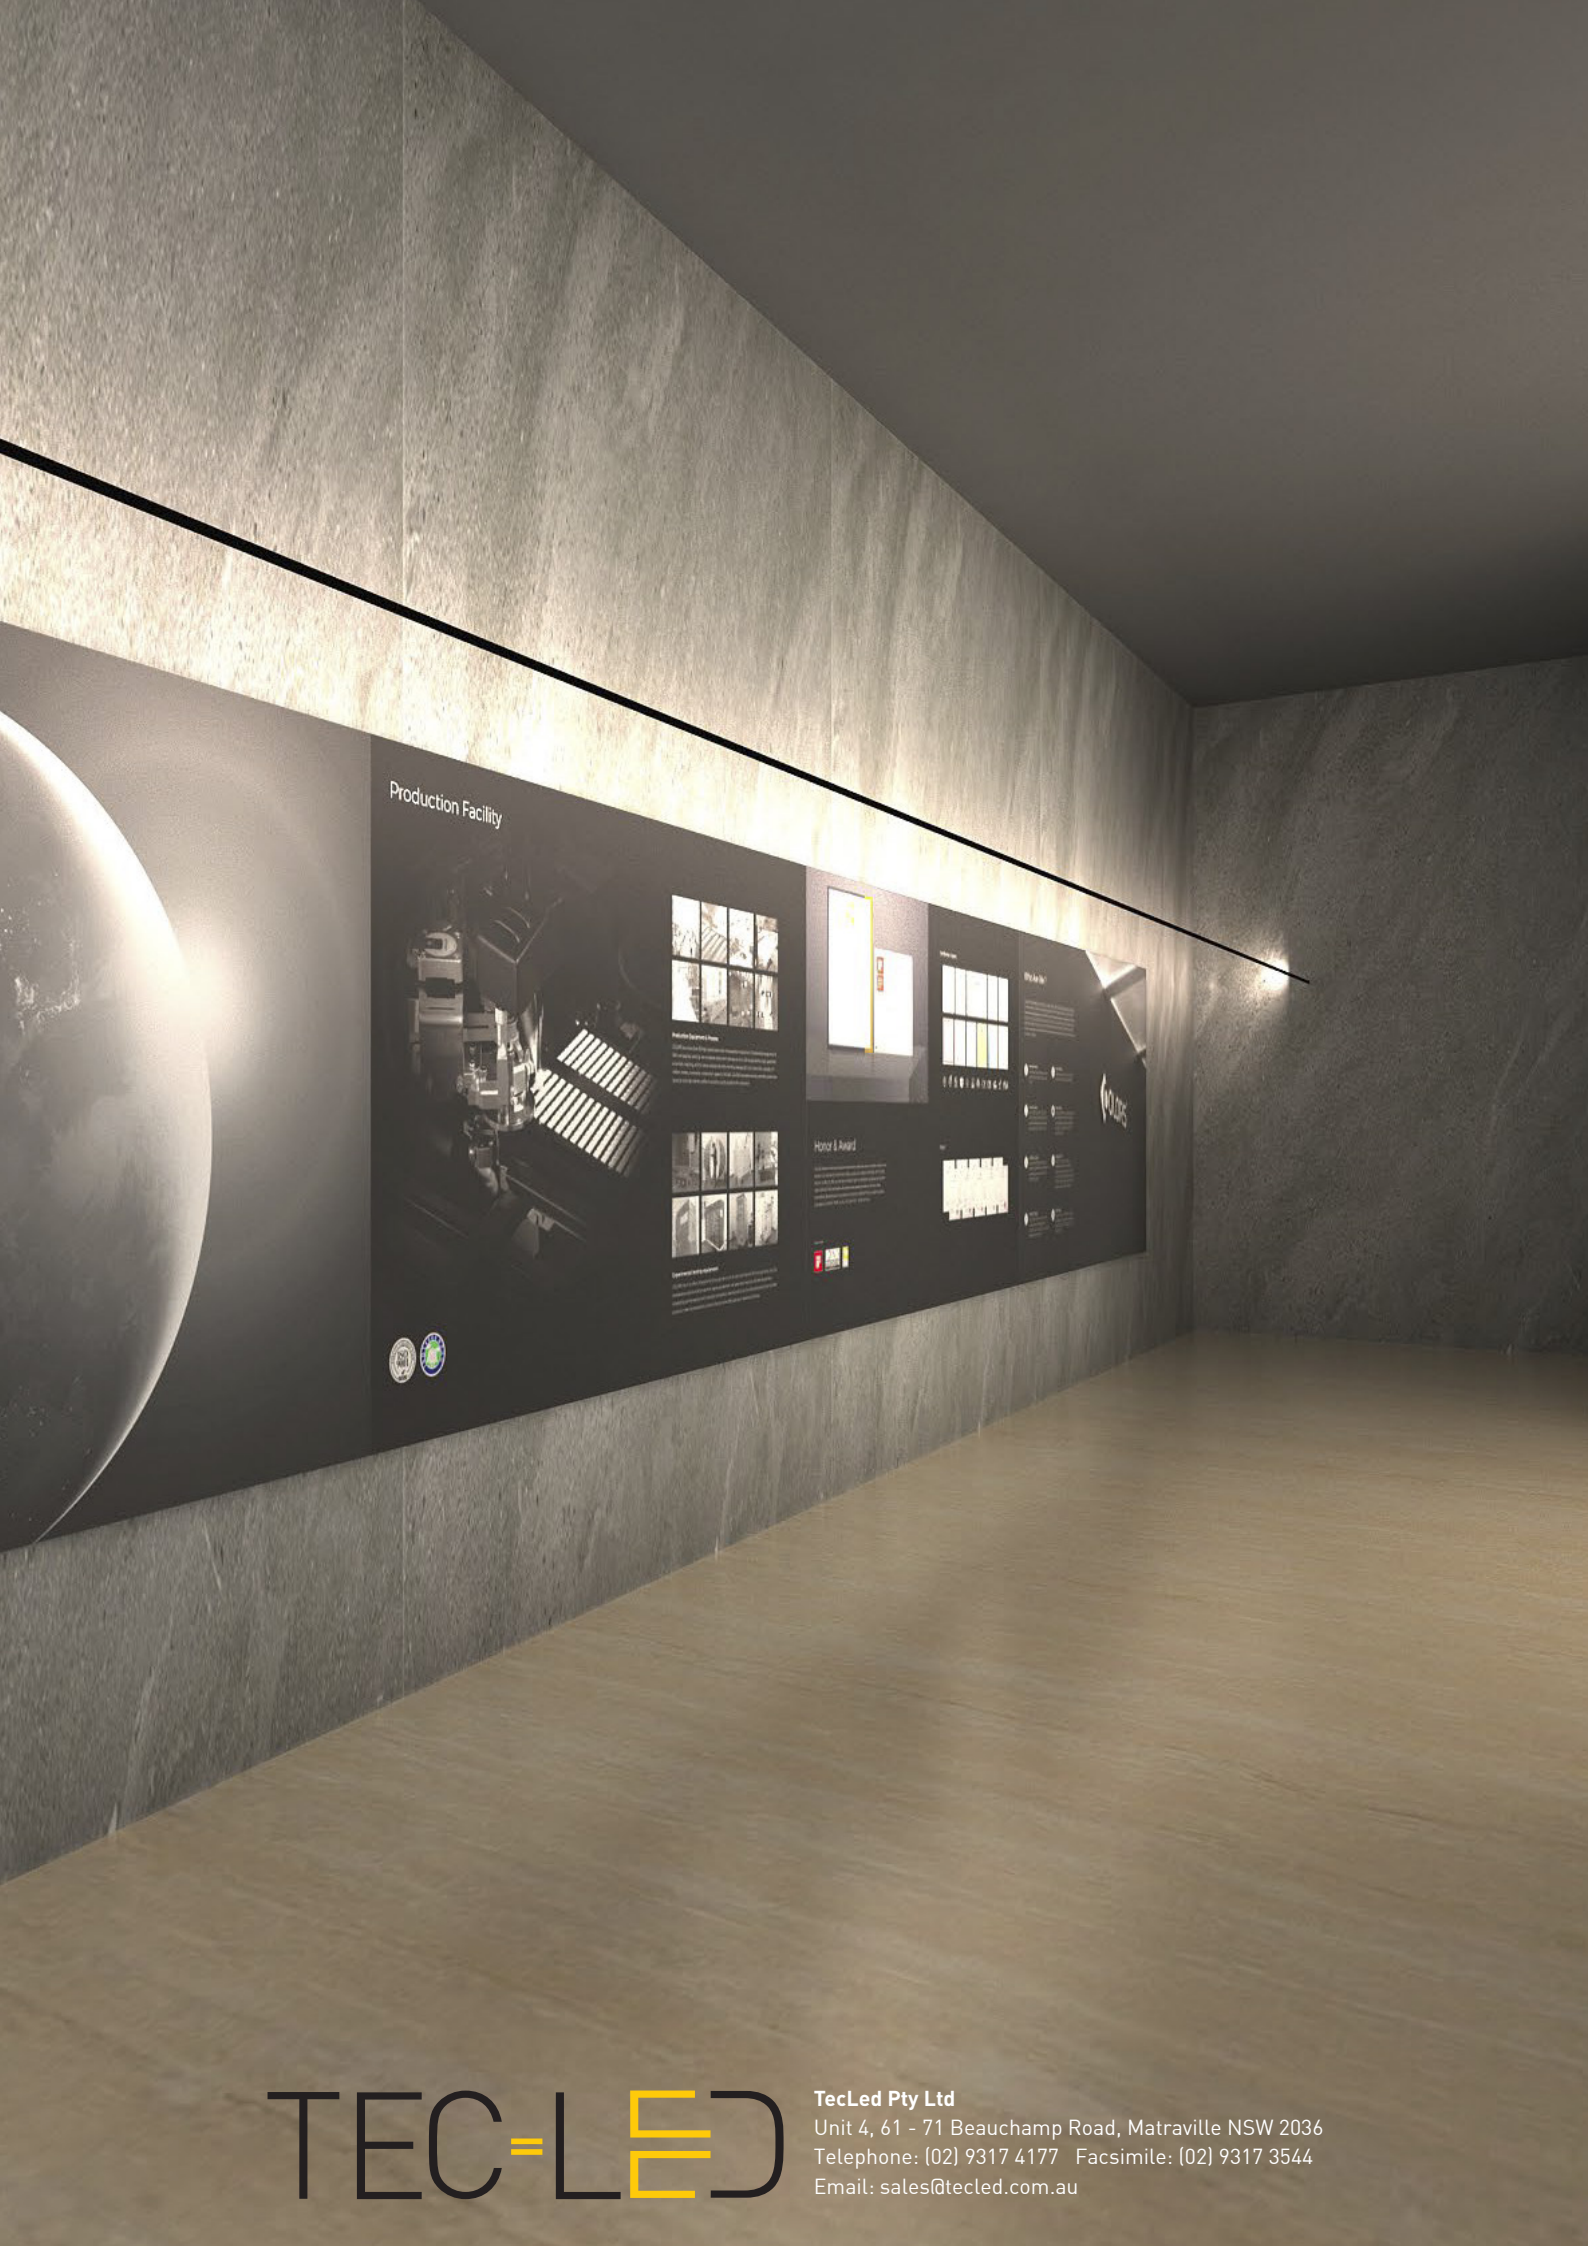

Dimmable via DALI, TRIAC or 0-10v

Watts	Lumens p/m	Colour				Max.	Input V
W	L						
14.4W 19.2W	1350 1700	2700K	3000K	4000K	6000K	10M	DC24V
